Features

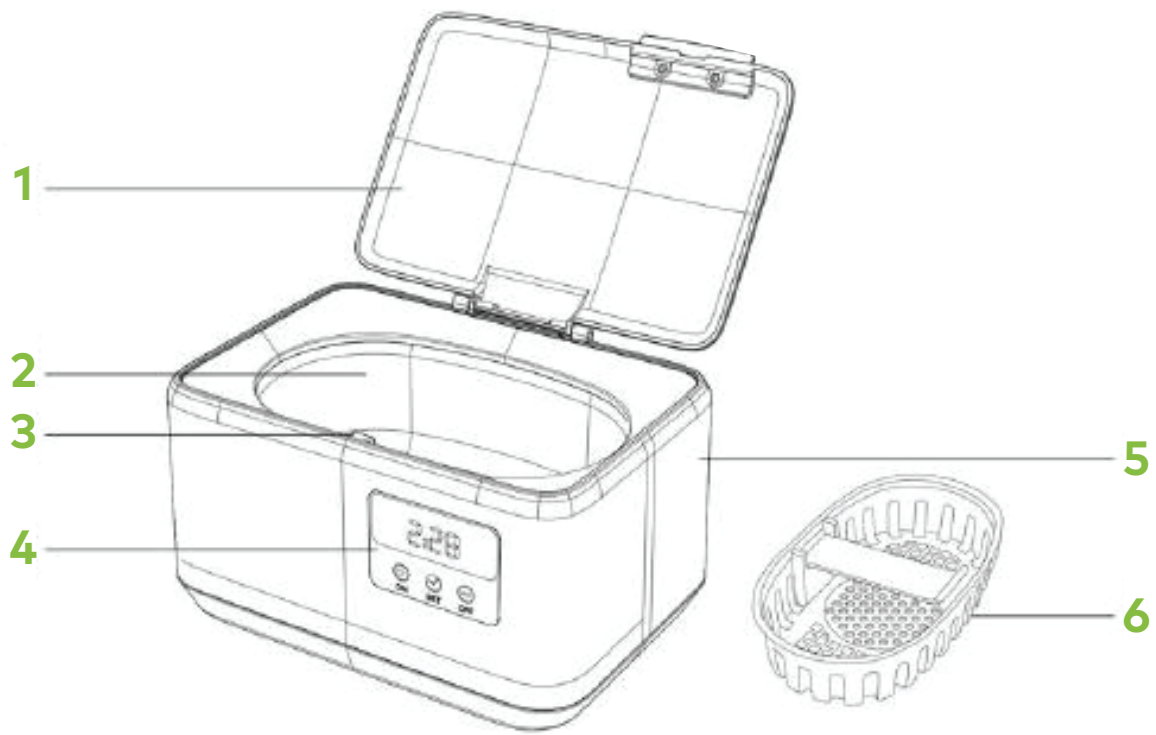

- 1. Provides deep and effective cleaning that removes dirt and grime from hard-to-reach areas.
- 2. Equipped with inner lighting to enhance visibility during the cleaning process.
- 3. Operates with minimal noise, ensuring a quiet and comfortable user experience.
- 4. Features a clear digital display for easy monitoring and control of cleaning times and settings.
- 5. Comes with a convenient cleaning tray to hold items securely during the cleaning cycle.
- 6. Simple and intuitive controls make it easy to operate, even for first-time users.

Application Guide

- 1. The pressure of sound waves traveling through liquid creates intense cavitation and emulsification effects, helping to break down contaminants.
- 2. Millions of microscopic cavitation bubbles are generated each second due to high-frequency mechanical vibration waves. These bubbles continuously burst, creating a powerful cleaning action.
- 3. The combination of strong forces and negative pressure suction breaks down stubborn stains into smaller particles, which are then separated from the item's surface and dispersed into the water.

Instructions for Use

1. Preparing Items for Cleaning: Open the lid and carefully place items into the stainless-steel bath.

Note: If cleaning glasses, ensure the lenses face upwards to avoid scratching. For jewelry, use the screen sieve provided, and place watches on the screen sieve bracket.

Warning: Do not operate the machine without water as it may cause damage.

2. Fill the bath with tap water, ensuring that the items are fully submerged. The water level must not exceed the MAX water level line indicated inside the bath.

Tip: For enhanced cleaning effectiveness, add a small amount of cleaning solution to the water.

- 3. Close the lid securely and connect the power supply. Ensure that the power cord is fully inserted into the socket to guarantee safe operation.
- 4. Upon connecting the power, the cleaning indicator will turn off after three seconds. The default cleaning time on the digital display is set to 180 seconds.
- 5. Press the "SET" button to cycle through available cleaning times: 480 ,300 ,180, or 600 seconds.
- 6. Press the "ON" button to begin the cleaning cycle at the selected time. The cleaning indicator will light up, and the machine will countdown until it displays "00" to indicate the end of the cleaning cycle.
- 7. To pause the cleaning process, press the "OFF" button. Resume by pressing the "ON" button to continue the countdown.
- 8. After cleaning, disconnect the power, open the lid, and remove the cleaned items. Carefully pour out the water from the steel bath and dry the machine with a clean, dry cloth.

 Specifications

Material	ABS, AS, 304 Stainless Steel
Tank Capacity	600 ml
Power Cord	UK 1.2m
Frequency	43KHz
Power Supply	AC 240-220V 60/50Hz
Rated Power	50W
Timer	90s-180s-300s-480s-600s
Product Weight	810 g
Product Size	113×130×190 mm

Troubleshooting

Problem 1: The machine does not turn on.

Possible Cause:

1. Check if the power supply is properly inserted into the socket.
2. Determine if the socket connection is secure.
3. Assess whether the power cord is damaged.

Solution:

1. Ensure the power plug is correctly inserted into the socket.
2. Re-insert the plug into the socket to ensure a tight connection.
3. If the power cord is damaged, contact the seller for a replacement.

Problem 2: Item is not properly cleaned.

Possible Cause:

1. Insufficient water in the cleaning tank.
2. Small amount of cleaning solution used.
3. Persistent stains on the surface of the item, especially if very sticky.
4. Item with a greasy surface.
5. Oxidation and blackening on gold and silver jewelry.

Solution:

1. Fill the bath with enough water to either immerse the cleaning item completely or up to the "MAX" water level line.
2. Add a small but appropriate amount of cleaning solution to the bath.
3. The item can be cleaned multiple times if necessary. It is best to wait 5 minutes between each cleaning session.
4. If the degreasing effect of tap water is insufficient, add an appropriate cleaning solution to assist in removing grease.
5. Use a cleaning solution specifically designed for gold and silver jewelry to remove the oxidation layer from the surface.

Problem3: The surface layer of the item is easily damaged

Possible Cause:

1. The cleaning strength of this machine is too strong for delicate surfaces.

Solution:

1. For items with electroplating or spray treatments on the surface, either shorten the cleaning time to prevent damage.
2. Place such items in a protective container before cleaning to safeguard their surfaces.

Problem 4: Unable to clean certain items

Possible Cause:

1. The cleaning strength of this machine is too intense for delicate materials.

Solution:

1. Pearl or jade jewelry should not be cleaned using this machine as it may damage these delicate materials.

Environmental Statement

1. This product complies with the "Measures for the Administration of Restricted Use of Hazardous Substances in Electrical and Electronic Products."
2. Throughout the product's intended environmental protection period, users will not experience harmful substance leakage, accumulation, or other health-related issues during normal operation. You may use this product with confidence.
3. The environmental protection usage period for this product is ten years, provided it is operated under the normal conditions specified in this manual.

List of Materials

Component Names	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent(v1) Chromium Cr	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)
Plastic	O	O	O	O	O	O
Hardware	O	O	O	O	O	O
Sealing ring	O	O	O	O	O	O
Electrical Components	X	O	X	O	O	O
Power Cord	X	O	O	O	O	O

Safety Precautions

1. Only qualified professionals should disassemble this product. Do not attempt to disassemble it yourself.
2. Do not connect the power supply before filling the unit with water. Ensure the water does not exceed the marked level line to prevent overflow.
3. Never touch the plug with wet hands to avoid the risk of electric shock.
4. Do not rinse the entire product as this could lead to electric shock.
5. Regular cleaning can significantly enhance item cleanliness. Optimal cleaning time is 5 minutes.
6. Avoid using this product while sleeping or drowsy.
7. Always turn off and unplug the device immediately after use.
8. Do not use this product in the bathroom.
9. Avoid placing the product in humid environments.
10. If the product falls into water, immediately cut off the power to prevent electrical leakage.

11. Do not use the product if the power cord or plug is damaged. Contact the authorized service professionals.
12. Ensure that children and minors are supervised by an adult when using this product.
13. Use this machine only for cleaning items that are listed as safe to clean in this manual.

Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.greenlion.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
